elmforreactdevs

Core

Senior

Elm JavaScript
ReScript
Semantic HTML CSS
Learning Haskell and
PureScript

Frontend

Senior

React Redux Vue Vuex
TailwindCSS Storybook
Web Components
Responsive Design
Design Systems

Backend && Systems

Intermediate

Node.js Rust MongoDB
MySQL

Practices

Senior

Functional Programming
Git Testing Agile
Code Review Teaching
Mentoring Interviewing

Languages

English (*Native speaker*)

Summary

Frontend engineer with over a decade of experience shipping quality features and building high-performance teams. Specializes in Elm and functional programming: leading rewrites, setting standards, and bringing React engineers along for the ride. Builds and open sources developer tooling for the Elm and ReScript ecosystems.

Experience

Avetta

01/2024 - Present

Senior Software Engineer

TODO: one-line description of what you worked on at Avetta.

- TODO: what you shipped and its impact
- TODO: the stack you worked in
- TODO: mentoring, standards, or hiring work

CareRev

08/2021 - 06/2023

Senior Frontend Engineer

Rewrote CareRev's React-based Facility app as a modern Elm application, on a platform that helps hospitals staff qualified nurses and gives nurses control of their careers.

- Re-architected the start of CareRev's React to Elm rewrite
- Shipped high-impact features and services like Smart Rates to high-profile clients, saving them time and money
- Mentored junior engineers and trained senior engineers on pure functional concepts
- Onboarded engineers of every skill level into an Elm codebase, and set the code practices and standards for Elm development
- Built codegen tooling to automate tedious work like Amplitude tracking and tracking-plan updates
- Implemented a design system in TailwindCSS with designers, and set up Storybook to visualize it alongside reusable UI
- Conducted hiring interviews and authored the code challenges used to vet candidates

Triller

09/2020 - 08/2021

Senior Frontend Developer

Rebuilt Halogen and integrated it into Triller's platform after the acquisition, adding live streaming and a web app to their suite of tools.

- Built the scheduled-stream and livestreaming tools used by artists like Jennifer Lopez and DJ Khaled to entertain thousands of fans
- Powered the Verzuz battle series, including realtime audience voting during broadcasts
- Reverse engineered web applications to bridge Halogen with Triller's existing platform

Omicron Media, Inc

11/2017 - 09/2020

Frontend Developer

Built Halogen, a live streaming platform for artists and creatives, using Elm, JavaScript, and Web Components.

- Grew Halogen past 120k lines of Elm; the platform was acquired by Triller
- Led the upgrade from Elm 0.18 to 0.19 and the migration from BEM-style CSS to TailwindCSS
- Onboarded and trained React engineers in Elm and functional programming
- Shipped tipping, gifting, chat, and live and prerecorded playback features
- Applied modern responsive design practices to support both mobile and desktop viewers
- Delivered robust features in short sprints with engineers, designers, and stakeholders, using agile practices to absorb changing requirements and shortened deadlines

Web Benefits Design

08/2017 - 09/2017

Frontend Developer

Helped rewrite an aging PHP application using React and Redux with middleware (redux-observable, redux-saga).

- Learned to structure a large React/Redux application

Interests

Fun Stuff

Miatas
Driving fast
Camping
Outdoor Recreation
Travel

- Picked up the fundamentals of observables with RxJS and honed functional programming skills

UCF Coding Bootcamp

06/2016 - 08/2017

Substitute Instructor && Teaching Assistant

Taught and supported students across HTML5, CSS3, JavaScript, jQuery, Node.js, responsive design, Heroku, Git, user authentication, Laravel, React.js, MySQL, and MongoDB. Graded homework and provided in-class and virtual assistance.

- Gave extracurricular lectures on topics students needed but the curriculum skipped: ES6 features, functional programming techniques, and Git fundamentals
- Discovered a lasting passion for education and mentoring

Trilogy Education Services

03/2017 - 04/2017

Software Test Engineer

Set up test automation and load tested APIs, from unit testing React components to end-to-end coverage of user flows.

Startup Media

11/2015 - 07/2017

Frontend Developer

Built frontend applications with designers, DBAs, and stakeholders, including gogreenback.com.

- Built gogreenback's web app in Angular.js, plus the webviews used by its iOS and Android apps
- Built an early company website in Backbone.js and a client dashboard in Node.js and Angular.js

Open Source Projects

elm-peek · <https://github.com/m0n01d/elm-peek>

Author

ReScript React Chrome Extension Elm

Browser extension that brings code navigation to Elm on GitHub, which GitHub's own stack-graphs don't cover. Hover an identifier for its definition and dependents, and get warned when a case expression silently swallows a variant the pull request just added.

resq · <https://github.com/m0n01d/resq>

Author

Rust ReScript CLI Developer Tooling

A jq-style CLI for querying and editing ReScript source, written in Rust and aimed at AI agents and scripts rather than editors: token-efficient structured reads and validated writes that leave the file byte-identical on failure. Ported from elmq.

elm-view-name-injector · <https://github.com/m0n01d/elm-view-name-injector>

Author

JavaScript Babel Elm DevTools

Post-compile transform that tags each Elm view function's rendered element with the function that produced it, giving Elm the DevTools-style component names it otherwise lacks. No source changes, no wrapper nodes, no runtime library.

elm-browser · <https://github.com/m0n01d/elm-browser>

Contributor

Elm JavaScript Debugger

Fork of elm/browser that adds state-change highlighting to the time-travel debugger, flashing changed fields and striping their ancestors so you can see what changed instead of re-reading the whole model tree.

pr-digest · <https://github.com/m0n01d/pr-digest>

Author

Python GitHub API macOS

CLI and macOS menu bar plugin that surfaces the open pull requests actually waiting on you, with a badge when something is new since you last looked.

Publications

Elm for React Devs

06/2023

YouTube

Videos and written content helping React developers transition to Elm and a functional programming ecosystem.
